Leaf Color	Green
Flowering Period	May
Flower Color	Green
Fruit Color	Black/Brown

It is native to eastern regions of North America. It is a deciduous tree with thick branches and scattered tree top. They may reach up to 45 m height. There are triple sharp spikes on trunk and branches. The leaves are pinnate. 4-5 cm long green flowers bloom in panicles. The fruits are long. It is propagated by seeds. They produce shoots. As they can be pruned, they are planted as natural fence around vineyards and orchards.
