

Photinia fraseri red robin bush (ROSACEAE)

Red-Tipped Photinia, Fraser Photinia

Price 0.00 ₺
Category Bush

Sensitivity	-
Resistance to Cold	7A (-17.7_-15.0) °C
Heat Resistance	H5A (+43.6_+46.3) °C
Root Structure	Eaves rooted
Body Color	-
Soil Type	-
Durability	-
Plant Size	2-5 meters
Plant Growth	-
Autumn Color	Multi Color
Request Light	Sun
Leaf Status	Evergreen
Leaf Color	Multi colour
Flowering Period	April
Flower Color	White/Cream/Grey
Fruit Color	Red/Pink

Photinia is a genus of about 60 species of evergreen shrubs and small trees. The regions in where the temperate Asia climate is observed are its natively distributed areas. They may grow up to 15 m. The leaves are 1.5-5 cm long. New buds are in flame red color. White flowers blooming in April and May are produced in dense terminal corymbs, and have a mild scent. As they tolerate heavy pruning, they are used for hedging as well.
